

## *Technology Committee – April 22, 2020*

*Mr. Spencer reported out at the April 22, 2020 Board meeting that technology is holding our District together and wanted to thank Tom Hein, Yvonne Herrington and administration. Mrs. Herrington thanked the technology department, social workers and building principals who have been working very hard to identify families who do not have internet service. The District secured MiFi devices for families that are in need of internet service and the technology department will begin distributing them this week. We've been hearing from teachers, parents and students that overall, the distance learning has been going really well. Teachers are using both zoom and learning management systems to keep in touch with students and to provide them with engaging and meaningful learning experiences. They are being flexible in order to meet the needs of our families. Mr. LoCicero and Mr. Castle commented on how our technology is working to provide instruction during this time and thanked the families for their patience during this process.*
