

### ***Technology Committee – April 24, 2023***

*The Technology Committee met on April 24, 2023. Mr. Hein reviewed the technology updates for the District including the next steps for cybersecurity, the roll out of Multifactor Authentication (MFA) and upcoming equipment rollover. Multifactor Authentication (MFA) is a way of confirming your identity when accessing District resources from outside the district. It requires more than just a password to authenticate.*

*Ransomware attacks start when a bad actor gains access to account credentials. With MFA the bad actors don't have the additional required information to access the target account. This keeps the bad actors out of the system and prevents the attack. The technology Committee is not scheduled to meet again until the 2023-2024 school year.*
